Customer Success Strategy & Ops Leader | Gainsight Certified

Customer Success isn't just a function—it's a growth engine. As a former enterprise CSM turned Ops leader, I build the strategy, tooling, and enablement programs that allow teams to scale smarter. I blend data, automation, and AI to drive strategic change management, removing friction so CSMs can focus on what matters: driving adoption, expansion, and retention. Let's connect if you're building the future of post-sales.
